EDUCATION

BNM Institute of Technology

Bachelor of Engineering in Computer Science - CGPA: 8.95

Bengaluru, India

November 2022 – Present

Indian National PU College

Pre-university College - 85.5%

Bengaluru, India

August 2020 – May 2022

Delhi Public School Bengaluru South

Central Board of Secondary Education - 83.4%

Bengaluru, India

March 2014 – March 2020

EXPERIENCE/INTERNSHIP

Kazunov 1AI Private Limited

Software Engineer Intern

Bengaluru, India

June – Present

PROJECTS

Mini Dio | Python, Django, Google Cloud Speech-to-Text, Google GenAI, Tailwind CSS, Bootstrap, PostgreSQL May 2025

- Prepared a system to generate comprehensive documentation for minutes of a meeting in markdown format.
- Multilingual support with Google Cloud Speech-to-Text and also deployed on Google Cloud.
- Generates minutes of meeting in a structured format with speaker diarization.

Beat Frame | Python, Streamlit, Librosa, OpenAI Whisper, GPT-4o, Stable Diffusion, MoviePy May 2025

- AI music-video generator that generates videos based on beat stamps.
- Uses OpenAI for descriptive prompts and Stable Diffusion for high quality image generation.
- Accurately generates high quality images resulting in quality content creation.

Play Pulse | Python, Pandas, Numpy, Plotly Express, Plotly Graph Objects, Streamlit, Scikit-learn December 2024

- PC, Consoles and Laptop Sales analysis and Prediction.
- Dataset for the project was collected from multiple shops and showrooms in Bangalore.
- Analyzed sales data contributed in the better inventory management.

Meme Wizard | Python, Flask, HTML, CSS, JavaScript, MongoDB, Gemini API, Imgflip API November 2024

- AI meme generator that generates memes based on sentiment analysis.
- Uses Gemini and Imgflip APIs to generate both AI and existing sentiment-based memes.
- Accurately captures real conversations, enabling targeted marketing and content creation.

Sonic Cleanse | **Personal Project** | Python, Flask, Librosa, SciPy, SoundFile, HTML, CSS, JavaScript, MySQL June 2024

- Noise suppression system built using high-pass filter.
- Restored corrupted audio files.
- Performed pre-processing on audio dataset to improve a model's feature detection.

TECHNICAL SKILLS

Programming: C, Java, Python, HTML/CSS, JavaScript, LaTeX

Databases: MySQL, SQLite

Frameworks: Scikit-Learn, Matplotlib, Seaborn, NumPy, pandas, Flask, Django

Developer Tools: Git, Neovim, VMware, CLion, DataGrip, PyCharm, IntelliJ, WebStorm, PhpStorm, Github, SSH

Operating Systems: Linux (Fedora, Kali, Ubuntu), Windows

CERTIFICATION AND ACCOMPLISHMENTS

IAMPro-2025 (Internship and Mentorship Program) – IEEE April 2025 - Present

Data Analysis with Python – IBM January 2025

Data Visualization with Python – IBM January 2025

Enigma Redesigned – Christ University – First Place December 2024

Python for Data Science – IBM May 2024
